As an Amazon Associate I earn from qualifying purchases. The name Land Rover was actually founded in 1948 by the Rover Company for its then new off-road utility vehicle. The company itself did not become an entity until a full 30 years later, when it evolved as part of the British Leyland empire. In 1994, BMW bought Rover, and in 2000, the Rover brand was broken up, with Ford acquisition of the Land Rover brand. However, Ford sold Land Rover and sister brand Jaguar to Indian company Tata Motors, as both brands thrived. The company's products also include the Range Rover brand of luxury SUVs. However, the descendant of the Land Rover, which all started it all, died early in 2016. At Haynes we aligned an extensive range of Land Rover repair manuals and online procedures available for professional mechanics and DIY car enthusiasts. We can give you all the guidance you need. Among all the off road vehicles on the market, the Land Rover brand has long been one of the most popular in many parts of the world. Driving a Land Rover is something a manager marks out, in many people's estimates, as a person who has been successful and likes to enjoy the gripping of that success. They are particularly popular with people who have homes in rural areas, because of the rough building that allows them to force rough terrain and get unsaved on the other side. Even those living in urban areas enjoy running a Land Rover for the view it gives them across the road. However, even a vehicle riddled like a Land Rover won't be completely immune to problems. Mechanically, any car is going to be false because of the fact that motor vehicles have to go through a lot to start, to keep moving and dealing with the huge variety of conditions they have to deal with. It is sensible to have a copy of a service manual in your glove compartment when driving your Land Rover, because the information included inside will be able to warn you of any problems that can become serious. Where Can I Create a Land Rover Service Manual? You can download a service manual from this site, free of charge, and then save the information on the hard drive of your computer. From there you can choose to print the information (as many times as you like) so you never need to be stranded without the most important information on what repairs you need. Thank you. - I have a tutorial on disk for Freelander online of ebay a few years ago. 1. Inspect the inner face of a rear hub back plate for the presence of a black and white rod code label. (Figure 1) WARNING: The manual parking brake process must be carried out in a safe manner, obey local speed limits and traffic regulations. NOTE: Global Technical Reference (GTR) lookup order is as follows: GTR Home > NAS > LF - LR2 > Service Information > 2008 > Workshop Manual > Section: 206-05 - Parking And Actuation. Them manual bedding procedure is shown in step 3. 2. If no label is present, beds are manually parked in the parking remedies as follows: ^ Adjust the parking pool cable. Drive the vehicle at about 24 mph. Apply the parking brake lever until a brake force is felt. ^ Apply the parking remedy lever a further notch. ^ Drive for 400 m (440 meters). ^ Stop vehicle. ^ Releases the parking pane. Warning: The transmission lever must be off in Park the parking boom and choke the front wheels. 3. Inspect the left parking bar cable at the point that it enters the body tube just forward from the fuel tank. 4. If the end of the parking brake cable does not sit in the body tube, put the parking brake cable as follows: ^ Remove the cable grommets from the retention brackets. Move the grommets approximately 10 mm in) rear fine to the centre. ^ Seat the end of the cable in the body tube. Install the cable grommets in keeping brackets. NOTE: Global Technical Reference (GTR) lookup order is as follows: GTR Home > NAS > LF - LR2 > Service Information > 2008 > Workshop Manual > Section: 206-05 - Parking Pane and Actuation 5. Adjust the parking remedy. Parking brake cable: All Technical Service BulletinsBrakes - Parking Brake System Issues No.: LTB00086 EDITION: 1 DATE: October 17, 2007 SECTION: 206-05 Parking Brake Adjustment Affected VEHICLE RANGE: LR2 (LF) VIN: 8H000212 - UnwardsModel Year: 2008 - UpwardS CONDITION SUMMARY: PARKING BAR CABLE ADJUSTMENT AND SHOES BEDDING-IN PROCEDURE Situation: A client can comment on the operation of the parking pane.
